

Data Intake Report

Name: XYZ Cab Investment Analysis

Report date: 5/13/2025

Internship Batch: LISUM45

Version:<1.0>

Data intake by: Leena Ganta

Data intake reviewer: N/A

Data storage location: [leenarganta/XYZ-Cab-Analysis](#)

Tabular data details: Cab_Data.csv

Total number of observations	359392
Total number of files	4, current one is Cab_Data.csv
Total number of features	7
Base format of the file	.csv
Size of the data	20.18 MB

Tabular data details: Customer_ID.csv

Total number of observations	49171
Total number of files	4, current one is Customer.ID.csv
Total number of features	4
Base format of the file	.csv
Size of the data	1.0 MB

Tabular data details: Transaction_ID.csv

Total number of observations	440098
Total number of files	4, current one is Transaction_ID.csv
Total number of features	3
Base format of the file	.csv
Size of the data	8.58 MB

Tabular data details: City.csv

Total number of observations	20
Total number of files	4, current one is City.csv
Total number of features	3
Base format of the file	.csv
Size of the data	0.0 MB

Proposed Approach:

- Mention approach of dedup validation (identification)

Each dataset will be reviewed for duplicate entries based on unique identifiers:

Cab_Data.csv: Checked for duplicates using Transaction ID.

Customer_ID.csv: Checked for duplicates using Customer ID.

Transaction_ID.csv: Checked for duplicates using Transaction ID.

City.csv: Checked for duplicates using City name.

- Mention your assumptions (if you assume any other thing for data quality analysis)

Some assumptions:

- Customer IDs represent unique individuals
- All City names are consistently formatted across all datasets
- All the transactions fall within the provided date range (2016-2018)
- The Payment mode data in Transaction_ID.csv is mapped correctly
- All the missing values in the important columns are considered as data quality issues and will be handled accordingly.
